

# How Much Will I Share?

**Essential Question: How might I be in control of the information available publically about myself?**

**Digital footprint:** all the information about you that is available publically through the web. This includes social networks such as Facebook, Twitter, LinkedIn, Instagram, and other database platforms by law enforcement, professional associations, political organizations and interest groups.

1. Using this worksheet, you and a partner will each list advantages/disadvantages to using social media networks. Then put a check next to each of the networks you use or have ever used in the past.

SOCIAL MEDIA NETWORKS	PROS	CONS

2. Next, on your own worksheet, each partner will highlight those networks on which you regularly check your privacy/security settings.

3. On the back of this page, for your eyes only, write a reflection about a time you or someone else shared information that had painful, embarrassing or negative consequences for the persons involved.
